

Evolve your business with the Microsoft Surface family

Designed for the modern workplace, Surface devices with Surface Hub create a connected experience that will change the way you work.

Surface devices combine the best of a laptop with the best of a tablet in one powerful, portable and versatile PC while Surface Hub brings meetings alive by facilitating creativity and brainstorming. Together, they drive productivity and advance the way people work together.

Microsoft Surface devices: The most productive devices on the planet

Powerful, portable and designed to maximise productivity, Surface Pro 4 combines the best of a laptop with the best of a tablet in one stylish device. They're fully functional PCs with the power to be your primary device while Surface Book is the ultimate laptop that transforms into three different configurations, adjusting to the way you work.

At home or in the office, the groundbreaking Surface is designed to suit all working styles.

Businesses are choosing Surface to:

- **Reduce costs:** rather than supporting two devices Surface replaces a laptop and tablet to make a more cost-efficient solution without losing any of the functionality your employees currently enjoy
- **Increase productivity:** with hardware designed to complement the Office environment to make for a more productive user experience
- **Enjoy mobility:** Surface is a sleek solution for those who want compact portability with a fully functional Windows PC
- **Transform technology:** with the latest Intel® processors, high-resolution touch screens, precise Surface pen, quality Dolby® sound and HD cameras

Microsoft Surface Hub: Built for teamwork

Microsoft Surface Hub integrates beautifully into the modern workplace, enabling productivity in any space where people come together to get things done, from large conference rooms to informal huddle spaces to offices.

The fully integrated design, choice of two screen sizes, and flexible mounting configurations means there's a solution for all your business needs.

Microsoft Surface Hub is also designed to be easy to deploy and manage remotely.

- **Designed for creativity** and brainstorming
- **Encourages** engaging and productive meetings
- **A new platform** for amazing large screen applications
- **All-in-one** (no need to add speakers, camera, pens, etc.)
- **Combines** the best of Microsoft's hardware, software, services and apps

“The difference with the Surface Hub is its focus on collaboration, with a marriage of hardware and software that other companies won’t be able to pull off.”

Jared Newman, PCWorld

Combining Surface Devices with Surface Hub

Transform your workplace into a centre for collaboration and innovation

Designed for the modern workplace, the Surface family allows you to share content effortlessly, so you spend your time connecting with people rather than technology.

- Provide next generation collaboration capabilities to drive engagement and productivity
- Bring meetings to life, face-to-face or remotely, with the versatility of Surface Pro 4, Surface Book and the power of Surface Hub
- Present sizeable amounts of data in large format to provide an enhanced customer experience

- Breathe new life into apps and data by viewing them from a different perspective
- Connect disparate business functions together to see things in a new light
- Deploy modern, efficient devices that attract and retain high-value employees
- Leverage the productivity tools you own and love – Office, Skype for Business and OneNote, plus the apps you need
- Seamlessly connect everyone in your organisation, regardless of their location
- Easily deploy and manage your Surface family

“...a revolutionary new computing platform that will become pervasive in the years ahead”

Mike Elgan, ComputerWorld
